E2 mtDSB OLs: ISR + cell cycle; EAE OLs: interferon-gamma + MHC; both: immune / reactive core
ATF4 / integrated stress response
cell cycle / survival
immune / reactive
mitochondrial & protein quality control
mature OL / myelin (down)
ISR (prespecified, 10 genes)
MHC class I
interferon (type I)
IFN-gamma (Irf1, Gbp, Irgm, Psmb8/9, Cxcl9/10, Stat1)
myelin (prespecified)
mtDSB responders
EAE lesion
EAE normal-appearing
